EXERCISE TIPS for YOUR DOG

1. **Downhill walking.** Improves front leg weight-bearing strength, abdominal strength, and spinal flexion. Then try uphill walking to improve rear leg strength and spinal extension.

2. **Do the happy butt scratch dance.** Vigorously scratch the top of your dog’s rear end. Most dogs find this stimulating and will “dance” from side to side with the rear legs, shifting their weight and strengthening these muscles.

3. **Try some paw power.** Give your dog a High Five! The dog will reach up with one paw. Repeat 2 to 3 times on each side. This movement exercises shoulders, front legs and elbows.

4. **Make your dog athletically inclined.** Get your pet to lift his front limbs from the ground by using a Physioball, going upstairs or even dancing. These exercises will strengthen the hind limbs. Repeat this exercise with the rear legs to strengthen the front limbs.

5. **Stand on three legs.** Lift one of your pet’s legs off the ground. If it’s the front leg, bring the leg forward. If it’s the rear leg, lift it backwards. Support the leg lightly so your dog cannot use your grip to help support himself. This exercise helps to improve weight bearing and strength.

6. **Rock on!** Grab a couch cushion, rocking chair, air mattress or commercial “bosu” — anything you can rock by hand. Stand the dog on what you’ve chosen and slowly rock. The dog will automatically shift weight to correct balance with every motion.

7A. **Do the roll over…** Start with your dog in the down/stay position, and hold a treat or toy near the nose as a lure. In a clockwise, circular motion, move the lure to the side of one shoulder, luring the head. After repeating and rewarding that motion, pull the lure up to the spine. When the dog begins to lose balance, praise him. With practice, he will roll over onto his back and complete the roll over.

7B. **Roll over…** Encourage your pet to stand on hind legs and stretch his front paws upward. If this is too difficult, have your dog rest his front paws on you. Later, when your pet stands after sleeping and stretches — by fully extending his front feet and raising his rear end — praise and reward him. Both positions provide needed extension of the spine.

7C. **Roll over.** Encourage your pet to stand on hind legs and stretch his front paws upward. If this is too difficult, have your dog rest his front paws on you. Later, when your pet stands after sleeping and stretches — by fully extending his front feet and raising his rear end — praise and reward him. Both positions provide needed extension of the spine.

8. **Join in a tug of war.** Great for core conditioning. Using a healthy treat for reward, have the dog’s head up as far as it will go and hold that position for a few seconds. Note: avoid this exercise if your dog has a history of back problems or if your dog is currently overweight.

9. **Stretch up, and then take a bow.** Encourage your pet to stand on hind legs and stretch his front paws upward. If this is too difficult, have your dog rest his front paws on you. Later, when your pet stands after sleeping and stretches — by fully extending his front feet and raising his rear end — praise and reward him. Both positions provide needed extension of the spine.

10. **Sit up and beg.** Encourage the dog to pull straight back — not side to side. A useful tip: hold the tug straight to the floor as this works the muscles in the front legs as well as the hind legs.

The Tina Santi Flaherty Rehabilitation & Fitness Service of The Animal Medical Center

• CONTACT INFORMATION •

To set up an appointment at The Animal Medical Center call 212-838-7053, seven days a week.

To speak directly to a staff member or to schedule an appointment at the Tina Santi Flaherty Rehabilitation & Fitness Service of The Animal Medical Center call 212-329-8610.

In case of emergency, bring your pet directly to The Animal Medical Center. Your pet will be examined and cared for by one of our veterinarians.

If you are a veterinarian making a referral, call the Referral Office at 212-329-8890 or 212-329-8833.

For general information call 212-838-8100 or visit www.amcny.org

© 2006 The Animal Medical Center

The Animal Medical Center is a non-profit institution that advances animal care, pioneers effective therapies, seeks safer and more convenient methods to diagnose illness, and builds academic and clinical teams that are world renowned.

Our doors never close. We are open 24 hours a day, 7 days a week and veterinarians are always on site to address pet emergencies and monitor hospitalized animals.

In addition, the expertise and experience of our veterinary team is unparalleled in the New York area. More than 80 veterinarians are on staff, and over one-third of them are board certified. As a result, many of our specialists are recognized as experts in their field.

Most importantly, we are a teaching institution. That’s one of the reasons why our treatments are always based upon the latest research and technology that veterinary medicine can offer.

The only facility of its kind in New York City
